

Using Live Session

A formal quick guide for starting, joining, and supporting Pre-Quran live classes.

Purpose

This guide explains the basic live-session flow: start the class, join audio, use the Current Lesson, and support students with the Virtual Tutor.

Live Session Workflow

1. **Open the Live Sessions page:** From the dashboard, find the scheduled session you want to use.
2. **Start the class:** If you are the teacher or admin, click Start class. This opens the BigBlueButton live room.
3. **Wait for the session to load:** The system may also open the Current Lesson in a separate window and the Virtual Tutor in another floating window.
4. **Join audio:** Inside BigBlueButton, join audio when prompted. Choose microphone if you will speak, or listen only if you are observing.
5. **Guide the class:** Use the live room to speak with students, use chat, and guide the class.

Support Tools

Tool	How it is used
Current Lesson	Shows the lesson students should follow during the class.
Virtual Tutor	Provides extra help. Students can type a question from the live lesson, and the tutor should guide them one step at a time.
BigBlueButton Room	The live room where the teacher speaks with students, uses chat, and manages the session.

During the Class

Keep the BigBlueButton room open. Do not close the Current Lesson or Virtual Tutor unless you no longer need them.

End of Session

At the end of the session, the teacher can leave or end the meeting from BigBlueButton.

Quick Reminder

Start the class, join audio, use the Current Lesson, and support students with the Virtual Tutor.
